Abstract of JP9235456

PROBLEM TO BE SOLVED: To provide a biodegradable film freed from the problem of blocking.
SOLUTION: This film is made from a composition containing at least two members selected from among lactic acid polymers, glycol/aliphatic dicarboxylic acid copolymers and polycaprolactones, an inorganic filler, and an ethylene/vinyl acetate copolymer. It may optionally contain at least one member selected from among heat stabilizers, plasticizers, lubricants and modified silicones.
